Catering and accomodation

NUFO is a party of 4. Sometimes we travel with a driver and/or roadie (we'll let you know).

Please provide:

- * an adequate backstage area (separated from the stage and audience area)
- * beer, water (natural and sparkling), some juices, snacks and fruits backstage
- * bottled natural water onstage
- * all drinks should be cooled (or served with ice).
- * warm meal (at least 1 vegetarian) or buy out (€ 15.- per person)
- * wireless internet access would be cool
- * single or double rooms with breakfast

We highly appreciate if you provide a bottle of gin, tonic water and ice for us at the backstage area!

Backline

Drums:

We need: 1 basedrum, 2 toms, cymbal stands and snare stand

We bring: breakables (to be used by NUFO only)

Guitars:

We need: 2 cabinets (2x12" or 4x12")

We bring: 2 tube heads incl. 2 Palmer PDI-09 and 2 guitar wireless systems (863,100 Mhz / 864,375 Mhz)

Bass:

We need: 1 bass cabinet (e.g. 4x10")

We bring: 1 Ampeg PF-800 head

Vocals:

We need: 3 vocal stands

We bring: 3 Shure SM58 (to be used by NUFO only)

We can provide the complete backline incl. drumset microphones. Please contact us in advance if there is any need to bring additional equipment.

Monitoring

We need 4 individual monitor mixes. Depending on various factors (location, stage, ...) we may use in-ear and/or classic speaker monitoring.

We bring our own in-ear devices. You simply need to plug in into our in-ear devices instead of the monitor speaker.

Mostly we are happy with classic speaker monitoring for all of us. Please provide at least one speaker for each musician as well as 4 individual monitor mixes.

In case there are not enough monitor mixes, we can use our Ui16 digital mixer. Kick, snare, vocals, guitars and bass will be connected directly to our Ui 16 mixer. The signals will be split by a channel splitter in order to get unaffected signals for the sound engineer / FOH mix (XLR male connector).
